

Allies Superiority Shown in Flanders

Numerous Submarine Bases on Belgian Coast Will Soon Be Cut Off From Enemy With Present Progress of the Big Wedge Being Forced Eastward

WASHINGTON, D. C., Oct. 11.—Ascendancy for the allies on the bloody fields of Flanders is claimed by Secretary of War Baker in the weekly review of war operations.

The review makes no reference to the American forces in France.

"The attention of the world," it says, "is focused on the titanic struggle now going on in Flanders. The battle raging there is proving an engagement of wholly unprecedented scope and potentialities."

"At the beginning of the week, owing to bad weather, the Germans were able to launch counter attacks against the positions recently gained by the British. Their efforts proved futile."

"It is significant, on the other hand, that while the British were sustaining the shock of German assaults successfully, they were able to bring up sufficient fresh troops to launch another offensive on an even larger scale than the preceding one."

"Slowly, but therefore the more irresistibly, the allied drive at the heart of the German line in the west is sweeping onward."

"The wisdom of the British in

maintaining a great density of front would appear justified by the results achieved during the past week. It must be borne in mind that it is due to the depth of the British line as much as to any other one factor, that while the enemy is still reeling under one blow, the allies are ready to deliver another and still a third.

"The defeats inflicted upon the Germans during the past fortnight are conclusive indications of allied superiority."

"The full success of these operations means that the Belgian coast, with its numerous submarine bases, will become untenable to the enemy. Zeebrugge, Ostend and the system of canals leading out of Bruges are threatened."

"The supreme test of the battle strength of the contending belligerents is taking place. Allied ascendancy would appear decisive."

"The two immediate contributing factors of this success are air control and shell supply."

The review sketches briefly the week's news from the other fronts, with the comment that reports from the Russian front are more encouraging.

Crop Conditions Over State Are Favorable

PORTLAND, Oct. 11.—Rain is needed greatly to facilitate plowing and seeding, but otherwise weather conditions in Oregon are favorable for crops, according to the summary of state crop conditions for the week, issued here by the government weather bureau.

The summary reads:

"Moderate temperature, with practically no rainfall, was favorable for the gathering of late crops."

"Rain is greatly needed to facilitate plowing and seeding, which work progressed where the condition of the soil permitted. Considerable winter wheat, rye and vetch are being sown."

HIGH SCHOOL NOTES

About thirty-five pupils have been enrolled in the night school, which is conducted by Mr. Koch. The most popular subjects are bookkeeping, typewriting, shorthand and penmanship.

Marion Taylor, professor of music at the high school, is ill with typhoid fever, and will not be able to take charge of his classes for several weeks. Miss Valeda Hoxie, a graduate of Willamette University, will substitute for Mr. Taylor. She will arrive tonight, and will commence her classes on Friday.

A number of the high school boys helped fight the fire at the Ewauna box company on Tuesday.

Tomorrow the first six weeks of the school term will be completed, and parents may expect report cards next week.

Ruby Shelby and Violet Balcome enrolled this week.

Miss Vera Frain has been compelled to give up her school work on account of poor health.

Several small pieces of oak cabinet work have been completed in the manual training department.

Last Thursday morning an assembly, Dr. George A. Cathey addressed the students on "The Causes, Effects and Prevention of Typhoid Fever."

All classes will be organized and the officers elected by the end of the week.

On Friday evening the reception for the freshmen and new pupils will be held at the high school.

Coach Niles reports that there are about twenty-five boys who are very faithful at football practice. Mr. Niles is arranging for games with Ashland, Grants Pass and Bend.

The sewing classes have used three bolts of materials in making garments for the Red Cross Society. The work will be finished in about two weeks, when twenty-two pairs of pajamas

"Corn is in good condition, and hardening well; late potatoes, beans and sugar beets were in fair to good condition."

"Heavy dews benefited meadows and ranges; stock poor to good."

"Apple harvest under way in all districts. There is a good crop of fine quality."

MEAT INJURIOUS TO THE KIDNEYS

TAKE SALTS TO FLUSH KIDNEYS IF BACK HURTS OR BLADDER BOTHERS

If you must have your meat every day, eat it, but flush your kidneys with salts occasionally, says a noted authority who tells us that meat forms uric acid which almost paralyzes the kidneys in their efforts to expel it from the blood. They become sluggish and weaken, then you suffer with a dull misery in the kidney region, sharp pains in the back or sick headache, dizziness, your stomach sours, tongue is coated and when the weather is bad you have rheumatic twinges. The urine gets cloudy, full of sediment, the channels often get sore and irritated, obliging you to seek relief two or three times during the night.

To neutralize these irritating acids, to cleanse the kidneys and flush off the body's urinous waste get four ounces of Jad Salts from any pharmacy here; take a tablespoonful in a glass of water before breakfast for a few days and your kidneys will then act fine. This famous salt is made from the acid of grapes and lemon juice, combined with lithia, and has been used for generations to flush and stimulate sluggish kidneys, also to neutralize the acids in urine, so it no longer irritates, thus ending bladder weakness.

Jad Salts is inexpensive; cannot injure, and makes a delightful effervescent lithia water drink.—Adv.

and twelve nightingales will be complete. The pupils of these classes average about one period a week for the Red Cross work. After Thanksgiving, comfort bags will be made for the Relief Corps.

On Tuesday morning at assembly the first set of slides sent out by the extension course of the university were shown, and Mr. Bain gave the accompanying lecture. These films showed the development of writing.

The class advisors for the year have been appointed and are as follows: Senior class, Miss Marshall, Mr. Reese; Junior class, Miss Mears, Mr. Taylor; Sophomore class, Miss Applegate, Mr. Bain; Freshman class, Miss Hammer, Mr. Koch.

Invisible Boats Will Elude the Submarines

WASHINGTON, D. C., Oct. 11.—Thomas A. Edison has evolved an "invisible ship" as a means to combat the submarine menace.

In United States shipping board circles it is being said that even more remarkable anti-submarine methods have been invented. But, like the Edison devices, long kept secret, the other measures are being kept quiet as far as possible.

Navy department officials say that Edison's system is practical, and goes beyond mere marine camouflage. It is a plan of knock-down superstruc-

ture combined with elimination of the turret-like construction fore and aft. The ship is also painted in colors blending with the ocean so as to be practically invisible when using smokeless coal.
